

Carnet de l'ingénieure ou de l'ingénieur

Documents utiles : <https://goo.gl/ekpxeJ>

NOM :

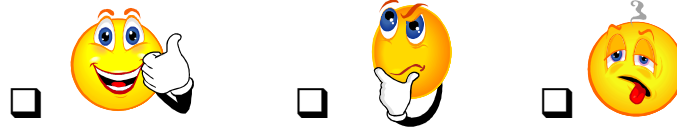

Qualités d'un bon ingénieur ou d'une bonne ingénieure

Stratégies associées à la science et à la technologie

- **Stratégies d'exploration**

Je peux **lier** un problème rencontré à un problème déjà résolu.

Je peux **anticiper** les actions du robot.

- **Stratégie d'instrumentation**

Je peux **laisser** des traces claires dans mon carnet.

- **Stratégies de communication**

Je peux **proposer** différentes solutions à un problème.

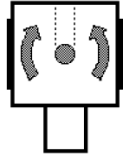

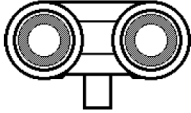

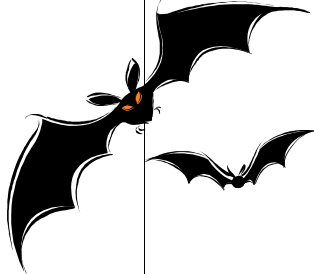

Je peux **utiliser** du vocabulaire varié pour échanger des informations.

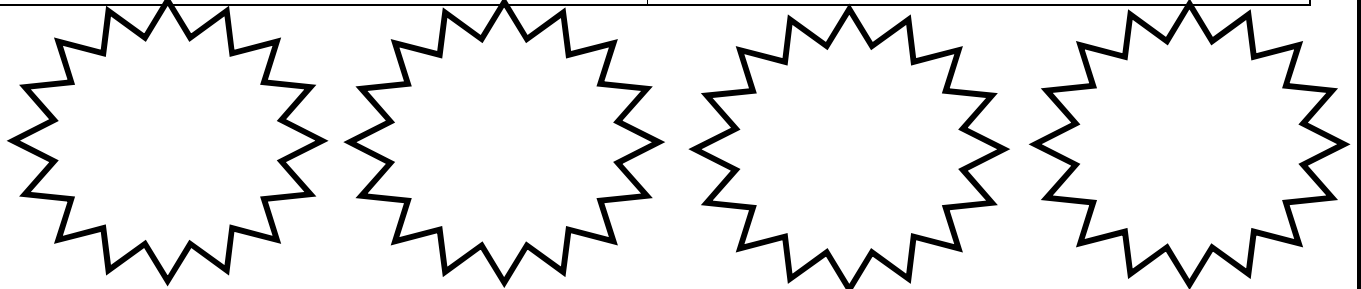

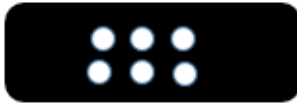

Moyeux, pneu, engrenage, brique,
poutre, câble, cheville, bloc, cadre,
bague, axe, port, capteurs, etc.

Port View

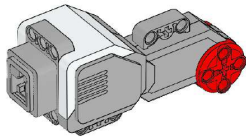

<p>Capteur Tactile (Touch)</p> <p>1</p> 	
<p>Capteur gyroskopique (Gyro-ang)</p> <p>2</p> 	
<p>Capteur de (col reflect)</p> <p>3</p> 	<p>couleur</p>
<p>Capteur d'ultrasons (Us-dist-cm)</p> <p>4</p> 	

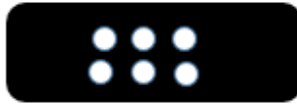

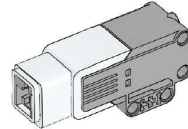

Motor Control

Gros moteur

Écran de démarrage

ENTRÉE

(Attendre, capteurs)

SORTIE

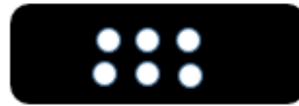

(Action, moteurs)

Palette des blocs complète

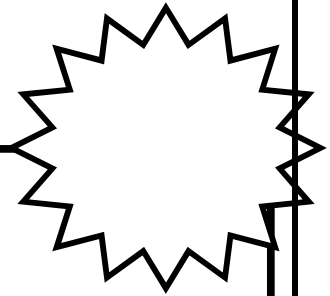

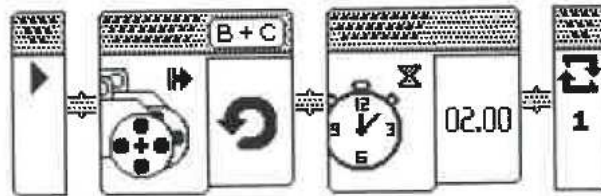

Début de programme

Confirmer ou ouvrir les choix d'un bloc

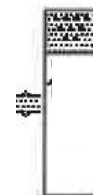

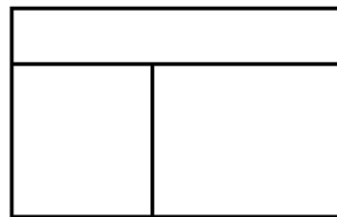

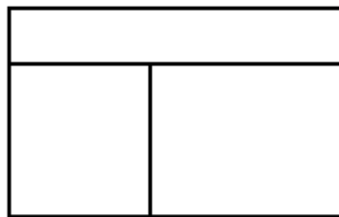

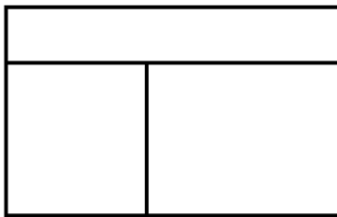

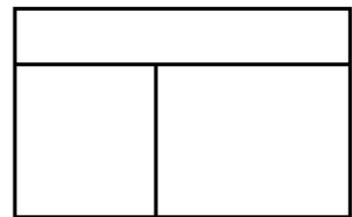

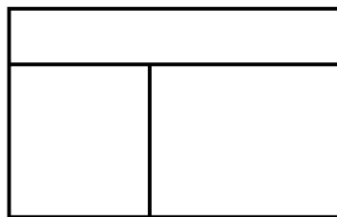

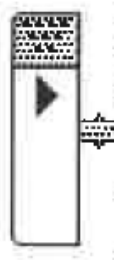

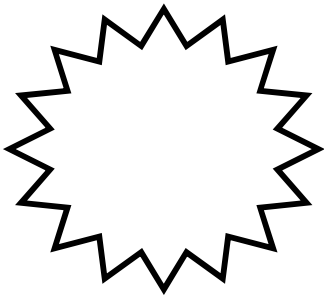

Ajouter un bloc

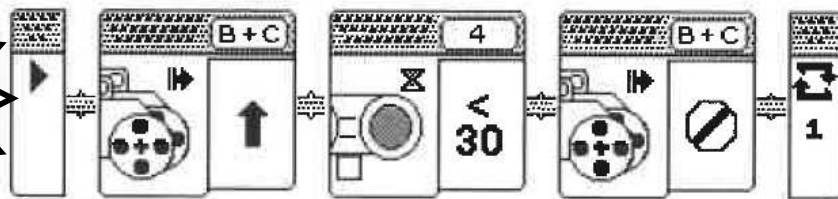

Défi 1: Observe le programme. Décris le comportement du robot.

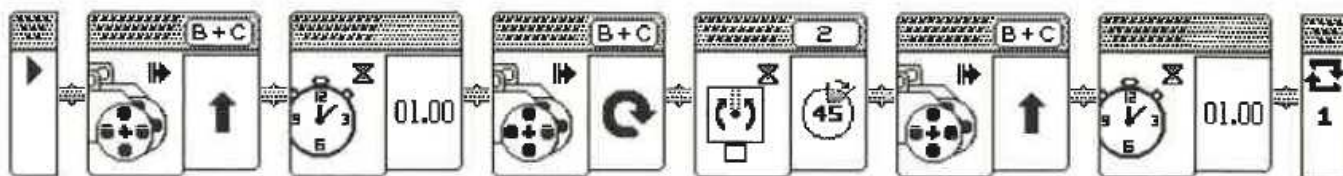

Défi 2 : Imagine un programme qui permet au robot de s'éloigner et de revenir exactement au point de départ.

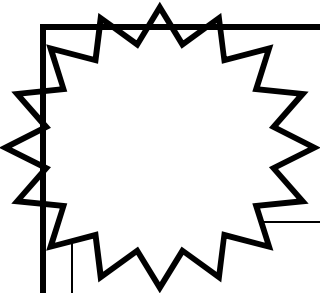

Défi 3 : Observe le programme. Décris le comportement du robot.

Défi 4: Observe le programme. Décris le comportement du robot.
